

Year 1 Science Knowledge Organiser

Animals (including Humans)

Key Knowledge

Animals can be grouped in lots of different ways, including – **mammals, birds, fish, reptiles, amphibians.**

Different animals, just like people, eat different things. Some animals eat meat, some eat plants, some eat a mixture of both!

Many animals share the same body parts, but some body parts are special to certain animals such as – **beaks, tails, wings, scales, fins.**

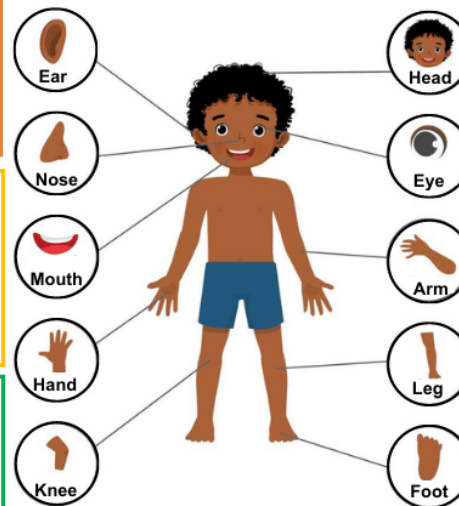

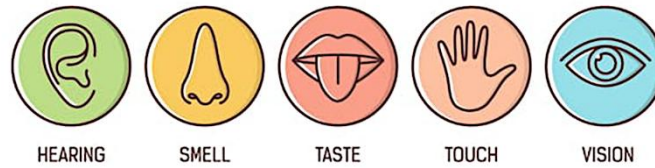

Some animals make good pets but not all animals can be kept as pets.

Humans have 5 senses – **sight, smell, hearing, touch and taste.**

Different parts of the body are used for each sense: sight – **eyes**, smell – **nose**, hearing – **ears**, touch – **skin**, taste – **tongue.**

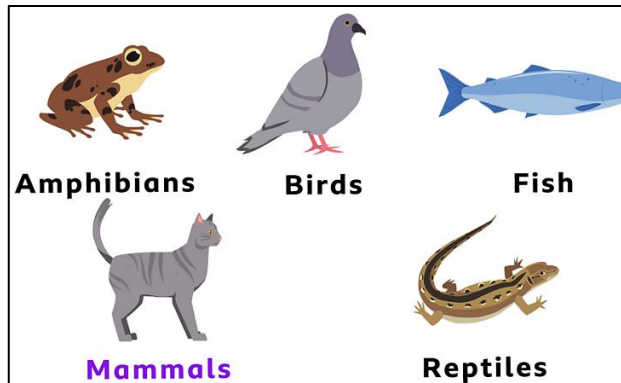

All animals have outside body parts and inside body parts. The parts on the inside are called **organs.**

FIVE SENSES

Key Vocabulary

Carnivore	An animal that eats meat.
Herbivore	An animal that eats plants.
Omnivore	An animal that eats a mixture of meat and vegetables.
Sense	A way that our body can experience the world around us.
Sight/Vision	What our eyes can see.
Smell	What our nose can detect. This can be good or bad!
Hearing	Sounds that our ears can hear.
Touch	When our skin feels something. It is not just our hands that can touch!
Taste	How our tongue helps us sense flavours.

Carnivore

Herbivore
